

Get the Best Intelligence From Multiple Sources of Data

How are these features generating intelligence?...

We take crowd-sourced images AND visual intelligence with machine learning to detect the assets on your roadways.

Things you can track using Payver:

- Paintline
- Pavement
- Barrels
- Debris
- Vegetation encroachment
- Sign detection
- Road work zones

“If you can see it so can Payver”

Key Features

- **Route Analyzer:** time it takes commuter to get to destination
- **Origin/Destination:** where people are coming from and where are they going
- **CerebroATMS:** live management of traffic assets/operations
- **SynapseSPM:** customizable signal performance metrics

Benefits

- **Connected Vehicles:** future of vehicle travel to enable safety critical applications
- **SAAS:** combining all of our technology efforts over the years into one application to manage traffic calming efforts. The best part is **“you only pay when you save.”**
